

Module 10.5 Practice Problems

Make a project and create app inside it and a template folder also. Then pass some context data and then filter the context data based on the blogs.

1. Follow the below websites and practice all the template filters

1. <https://www.geeksforgeeks.org/django-template-filters/>
2. <https://earthly.dev/blog/django-template-filters/>

2. Practice the Simple Page Navigation project again and again
